PROFILE

Current I.T Midrange Application Developer with three years of Web/Software Development experience, looking for opportunities to make the switch back to Web Development in roles specializing in a modern technology stack. Industry experience working in front-end and back-end development. Passionate about creating seamless and efficient web solutions.

EMPLOYMENT HISTORY

APS5 I.T Midrange Application Developer

Fontis

March 2023 – Current

About My Role

Working as an Application Developer in an agile team, developing and deploying end-to-end solutions on our data exchange platform and integration with external services. From solution design to implementation.

Responsibilities:

- ▶ Building scripts that streamlines our teams workflow and build and release pipeline
- ▶ Implementing end-to-end solutions with application development, database configuration, deployments, and code reviews.
- ▶ Working with senior developers and solutions architect in the design phase of technical solutions
- ▶ Collaborating in a highly functional and adaptable agile team
- ▶ Upskilling and mentoring junior functional testers within the team

APS4 I.T Systems Analyst

Australian Taxation Office

February 2021 – March 2023

About My Role

Working as a flex role in an agile team, delivering end-to-end solutions on our data exchange platform and integrating it with external services. My main role on this team is an application and systems developer with a secondary role in assisting with functional testing work as well.

APS3 I.T Graduate

Australian Taxation Office

February 2020 – February 2021

Graduate Web Developer

Fontis

September 2019 – February 2020

About My Role

Worked in a small team as the role of a Web Developer doing both front-end and back-end development. Developed and designed eCommerce web applications and consulting with business clients to deliver beautiful, responsive, and fast web products.

Responsibilities:

- ▶ Implementing and designing new features and functionality on the eCommerce web applications using JavaScript and modern frameworks such as TypeScript and Vue.js
- ▶ Utilizing AWS Cloud solutions for back-end development of the web applications such as S3 Buckets and Lambda functions
- ▶ Consulting with clients to deliver technical enhancements to their platform in line with their business requirements
- ▶ Major contributions towards two projects from start to finished product

EDUCATION

Bachelor of Computer Science

RMIT University

February 2016 – July 2019
