## PROFILE

Current I.T Midrange Application Developer with three years of Web/Software Development experience, looking for opportunities to make the switch back to Web Development in roles specializing in a modern technology stack. Industry experience working in front-end and back-end development. Proficient in HTML, CSS, JavaScript and Java. Passionate about creating seamless and efficient web solutions.

## EMPLOYMENT HISTORY

### **APS4 I.T Systems Analyst** Australian Taxation Office

February 2020 – Current

#### About My Role

Working as a flex role in an agile team, delivering end-to-end solutions on our data exchange platform and integrating it with external services. My main role on this team is an application and systems developer with a secondary role in assisting with functional testing work as well.

#### Responsibilities:

- ▶ Assisting the development team in implementing end-to-end solutions with application development, database configuration, deployments, and code reviews.
- ▶ Contributing to the design of our proposed technical solution within our platform
- ▶ Developing mock API services for testing our integration with real-world APIs
- ▶ Collaborating in a highly functional and adaptable agile team
- ▶ Building scripts that streamlines our teams workflow and increases output within the team
- ▶ Assisting with functional testing for newly implemented solutions
- ▶ Upskilling and mentoring junior functional testers within the team

## Graduate Web Developer

Fontis

September 2019 – February 2020

### About My Role

Worked in a small team as the role of a Web Developer doing both front-end and back-end development. Developed and designed eCommerce web applications and consulting with business clients to deliver beautiful, responsive, and fast web products.

### Responsibilities:

- ▶ Implementing and designing new features and functionality on the eCommerce web applications using JavaScript and modern frameworks such as TypeScript and Vue.js
- ▶ Utilizing AWS Cloud solutions for back-end development of the web applications such as S3 Buckets and Lambda functions
- ▶ Consulting with clients to deliver technical enhancements to their platform in line with their business requirements
- ▶ Optimizing and maintaining web applications to ensure it is responsive in design and fast in performance
- ▶ Major contributions towards two projects from start to finished product

## EDUCATION

### Bachelor of Computer Science

RMIT University

February 2016 – July 2019
